

Cad Training Programme

CaddHawk Provides career programs & job oriented certification to the qualified engineering students. Our Training programs have been designed by taking inputs from industry Experts & academicians.

A revolution in education required to produce skilled man power to reduce the unemployment, for which we have put our step and giving the corporate Training Programme to the professionals who willing to make their career on the ground of Cad Drafting & Design.

During Training we record 90% attendance is mandatory for the trainees , then we offer Live Projects assistance in the field of 2D Cad & 3D Cad (Computer Aided Design) helps to develop the industrial feel & self confidence.

Development through continues practice and effort by asking the maximum doubts / questions to our experts is the way to me mastery.

However if some trainee found to be more interested or found as a poor (Not able to give the fees), we declare as a Free of cost training for the same.

An Institution or an Engineering School / College may achieve our 'Training Programme' & we always prefer to share our knowledge to the mass of people by which a growth will come to nation. We start the Training in the Own campus of the institution, so that it become more easy for the student to attend the Class & gaining the knowledge.

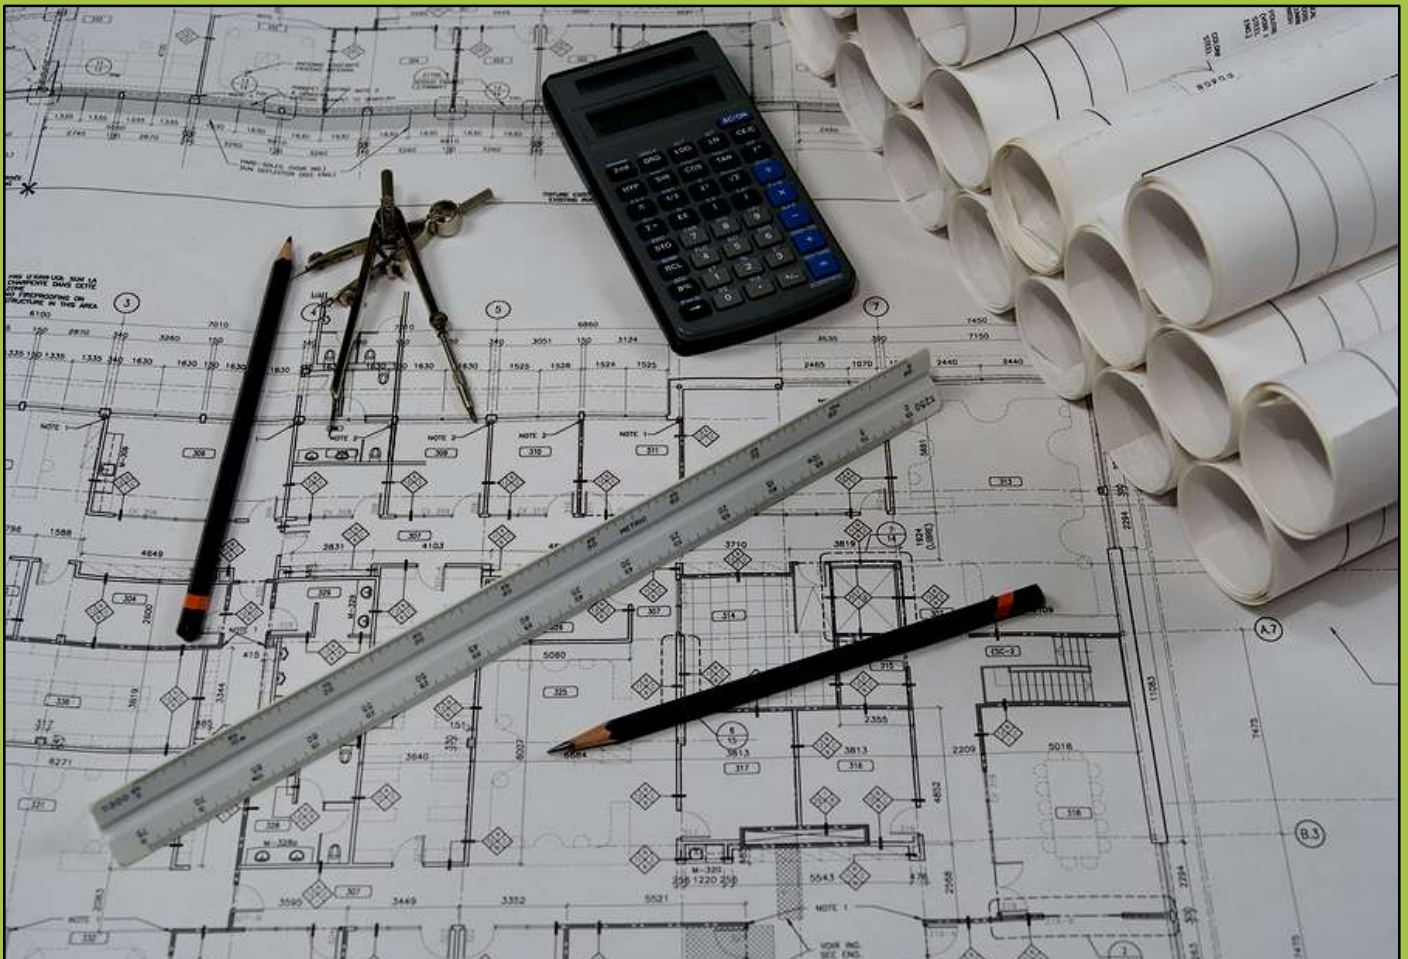

We serve & we remain focus to service. Caring the nation's growth by our little span of life and our hard labour, so that the coming generation will occupy the first position among the International competency.

Key of success lies in continuous effort and interest to do something extra; so that the world will remain remind you. Come & Join behind the row of national growth.

Course Name: Advance Drafting & Designing.

Training on CAD by which one can work on dimensioned Cad Conversion, Plans, and Elevations & Sections of an Object.

- ***Cad Conversion.***
